ALDE AND ORE ESTUARY ASSESSORS REPORT

| | |
|-----------------------------|--|
| NAME[S]: R Baxter | DATE OF INSPECTION: September 2020 |
| FLOOD CELL: FC2 | AREA OF ASSESSMENT: Butley Mills |

SUMMARY

| River Wall/Armour | Saltings | High Tide Debris Line |
|-------------------|-----------|-----------------------|
| Very good | Reed beds | Not evident |

River Bank Surveyed:

OVERVIEW & PHOTOS

The river wall separates the lane from the estuary.

The wall is substantial, with good vegetation cover. Path little used and no evidence of horse damage, as in previous years.

Reed beds are dense and cover the saltings down to the Butley river channel. Two sluices provide adequate drainage from the mill ponds.
